

Upgrading phpMyFAQ

3.4. Upgrading phpMyFAQ 2.8.x

Updating an existing phpMyFAQ 2.8.x installation is fairly simple. Via FTP copy all new files from the phpMyFAQ package **except**:

- all files in the directory **config/**
- all files in the directory **assets/template/**
- the directory **attachments/**
- the directory **data/**
- the directory **images/**

Open the following URL in your browser:

<http://www.example.com/faq/install/update.php>

Ab Version 2.9.0

<http://www.example.com/faq/setup/update.php>

Ab Version 4.0.0

<http://www.example.com/faq/update>

Choose your installed phpMyFAQ version and click the button of the update script, your version will automatically be updated.

You can find the changed files between the 2.8.x versions in the file CHANGEDFILES.
