

# OBS

## How to submit a maintenance update for the stable openSUSE releases?

Beispiel anhand von phpMyAdmin:

The command workflow is...

```
osc mbranch phpMyAdmin
```

```
osc co home:ecsos:branches:OBS_Maintained:phpMyAdmin
```

Then update both phpMyAdmin.openSUSE\_13.2 and phpMyAdmin.openSUSE\_Leap\_42.1 to 4.4.15.6 and commit.

Finally, submit

using "**osc mr**" or something like **osc mr . -m "security update see boo#1012271"** in the project directory.

```
osc mr -m "security update see boo#1012271" in  
home:ecsos:branches:OBS_Maintained:phpMyAdmin.
```
